Communication Manager Express (Formerly MultiVantage Express)

Communication Manager Express (formerly MultiVantage Express) is based on Avaya Communication Manager Software and the S8500 Media Server and is designed as a complete solution for the Midsize Business (100 to 500 extensions). It enables enterprise applications while maintaining Midsize Business functionality and providing excellent value. While Avaya continues to offer ad-hoc capabilities for the Midsize Business, the MultiVantage Express Solution was designed to pre-integrate these components in a way which covers mainstream enterprise communications needs, while establishing upgrade paths to the more advanced packages of each component.

Communication Manager

Communication Manager builds on decades of enterprise telephony leadership to bring industry leading, intelligent call processing to your enterprise. It enables call control on a dynamic, call-by-call basis, along with full telephony functionality—then takes this to the next level by adding support for new applications, infrastructure, and Communication devices. Running on a variety of Media Servers and providing control to Media Gateways and Communication Devices, Communication Manager can be designed to operate in a distributed or networked call-processing environment. As the power behind the enterprise class portfolio, Communication Manager provides rock-solid performance to today's enterprise.
